

Action Guide

354: Agile Product Development

Brian Cohn

Application Questions

1. What value have you found in using Agile principles for software or hardware products? Have you had challenges applying Scrum to hardware products?
2. What process do you currently follow to make decisions? Does it need improvement?
3. If you've used timeboxing, how does it help you? If not, do you think it would help you?

Actions to Take

What to Do Now

- Identify which processes you're currently using for projects. Are you using Agile or Scrum principles?
- Note any challenges you're having with your current processes.

What to Do Soon

- When you're working on a project, use timeboxing to keep your work moving forward.
- If you're working on a hardware product, try the D3 Model to incorporate Agile principles in a way that's tailored to hardware products.
